Summary

I'm a Computer Science student specializing in Cybersecurity, passionate about building AI-powered tools that make design more accessible. As the founder of VeerNeo, I've led product direction and prototyping for a generative AI platform that turns text prompts into 3D models. I've also worked as Operations Head at my university's E-Cell, where I helped organize events and lead student teams. I'm Actively learning cybersecurity concepts and best practices in preparation for ISC2 Certified in Cybersecurity (CC) certification.

Professional Experience

VeerNeo
Founder
07/2025 – Present
- A generative AI platform that lets users design and edit 3D models through natural language prompts; led product vision, prototyping, and early team coordination
Entrepreneurship-Cell @DSU
Operations Manager
2024 – present
- Oversaw event workflows, volunteer teams and logistics to ensure smooth E-Cell operations.

Skills

- Python
- Generative AI and ML
- C programming
- Threat Detection
- Network Vulnerabilities
- HTML, CSS ,actively learning React
- Communication
- Team work and Management

Certificates

- Mastercard - Cybersecurity Job Simulation ⌷
- AWS Educate Introduction to Generative AI ⌷
- City of Moreton Bay - Entrepreneurship and Innovation Job Simulation ⌷
- Microsoft- Introduction to AI Concepts ⌷
- Cisco's Introduction to Cybersecurity ⌷
- Introducing Cybersecurity-SAP ⌷
