EDUCATION

Dayananda Sagar University

Bangalore, India

B.Tech in Computer Science and Engineering (Cybersecurity)

2024 – Present

- Relevant Coursework: Cybersecurity Fundamentals, Artificial Intelligence, Machine Learning, Network Security, Data Structures

EXPERIENCE

Founder

Jul 2025 – Present

VeerNeo

Bangalore, India

- Building a generative AI platform that converts natural language prompts into editable 3D models.
- Designing system architecture for prompt-based 3D generation and modular component editing.
- Developing AI workflows using Python and generative models for automated 3D asset creation.

Operations Manager

Oct 2024 – Jan 2026

Entrepreneurship Cell, Dayananda Sagar University

Bangalore, India

- Managed operations and coordinated volunteer teams for entrepreneurship events.
- Collaborated with DERBI and AIC-DSU to support startup and innovation initiatives.
- Organized campus events promoting entrepreneurship and technology innovation.

PROJECTS

AI-Powered Phishing Training Platform | *Python, Django, Scikit-learn*

Ongoing

- Developing an adaptive cybersecurity training platform that simulates phishing attacks with dynamic difficulty levels.
- Using Random Forest for user profiling and Isolation Forest for anomaly detection.
- Building a Django backend with interactive scenarios and analytics dashboards.

Web Vulnerability Scanner | *Python, Django, Docker, PostgreSQL*

- Developed an automated web vulnerability scanner to identify common security weaknesses in web applications.
- Implemented vulnerability checks and generated structured PDF security reports.
- Deployed using Docker, Unicorn, and Nginx in a containerized environment.

SENTINEL: Automated Fugitive Detection System | *Python, OpenCV, Computer Vision*

- Built a real-time face detection and recognition system using Haar Cascades and LBPH.
- Applied temporal stabilization with voting-based smoothing to reduce false positives.
- Optimized for edge deployment on Raspberry Pi using lightweight pipelines.

TECHNICAL SKILLS

Languages: Python, C, SQL, JavaScript

Frameworks & Tools: Django, FastAPI, Docker, Git, PostgreSQL

AI / ML: Machine Learning, Generative AI, Scikit-learn

Security: Threat Detection, Network Vulnerability Analysis, Secure Development

Web: HTML, CSS, React (Learning)

Systems: Linux (Ubuntu), REST APIs
